

Import MLS Listing information directly into your zipForm® Plus contracts.

Quickly import MLS listing information into forms using the MLS number to increase accuracy and reduce repetitive data entry. Open a form in zipForm® Plus (*Tip: Use the Cover_Sheet form for the best import results*) and click the MLS Connect button located above the form (1).

2. Select the **MLS Name** and enter the **MLS User ID** and **Password**, if required.
3. Select the **Listing Type** and enter the **MLS Listing ID**, and check the box to include the property photo if it is available.
4. Click **Find** to search for this listing on the MLS.
5. Confirm the MLS listing information is for the correct property and click **Import**.

zipFormMLS-Connect® can be used from zipForm® Plus, zipForm® Standard (located under the Tools tab), and zipForm® Mobile Web Edition (6) (located within the More button).
